- Two part loading table
- Empty pallet magazine to accommodate 15 pallets

REFERENCE

The company Borco, a bottler of spirits in Hamburg, commissioned three Meypack PK 110 palletisers to palletise wrap-around cases. Three Meypack high-speed palletisers with fully automatic empty and full pallet transport were supplied for the palletising centre. These machines are equipped with servo drives and maintenance free toothed belts. The palletisers are outfitted with a visual touch panel and have no format parts. All adjustments are carried out by servo-motor and are stored in the software. A Haloila pallet stretch-wrapper was also supplied.

Borco-Marken-Import GmbH & Co. KG, with more than 60 brand name products, is one of the largest, privately owned bottlers of spirits in Germany. The company was founded under the name Borco Borm & Co in Hamburg in 1948.
