REFERENCE

HiPP GmbH & Co. Export KG

In 2007, Meypack delivered a VP 530 SW 90 TM-60 end-packaging system to HiPP GmbH & Co. Export KG in the Austrian town of Gmunden. The machine can pack jars of baby food and toddler food plus glass bottles filled with children's juice into a variety of pack sizes, both in trays with or without film as well as just in film simply as multipacks. As an option, two trays can be shrink-wrapped together. The shrink tunnel is not heated electrically but instead uses cost-saving gas.

The company HiPP from Pfaffenhofen, Germany is an enterprise rich in tradition. It produces organic food for babies and toddlers and sells around 230 products into all corners of the world. The company has production facilities and areas of cultivation in Germany, Austria, Croatia, Russia, Hungary, Switzerland and the Ukraine.
