- VP 453 tray-lid case packer
- Packs folding boxes (bag-in-box) and pouches in display trays with lids
- Single lane product infeed via a servo-driven paddle chain
- Simple format changeovers

REFERENCE

Podravka d.d.

At Podravka's production facility in Koprivnica, Croatia, a Meypack VP 453 tray-lid case packer packs diverse folding boxes (bag-in-box) and pouches containing baby food into trays with lids. The products come from two different production lines and are brought together into a single lane before they enter the packaging machine, where they are packed in display trays. Depending upon the product, the pouches and folding boxes are positioned upright in the trays in either one or two rows. The packaging machine is equipped to handle both variants and can be easily changed over when required.

Located in Koprivnica, Croatia, Podravka produces brand name food, beverage and pharmaceutical products. The company was founded in 1934 by the Wolf brothers. Today, Podravka is one of the leading companies in Central, Eastern and Southeastern Europe and sells its products worldwide.
